Greening the College Curriculum
A debate-style reader provides an introduction to controversial issues in American foreign policy, followed by arguments presenting opposing viewpoints on the topic.

History of Psychology
The Relativity of Deviance is a primer on the constructivist perspective on deviance—the idea that deviance cannot be explained in terms of absolutes, nor can it be understood apart from its social setting. The book is frequently used alongside all of the major core deviance textbooks on the market. It answers such questions as: What is deviant? What is deviant behavior? How should the deviant be treated? Why is the same act sometimes praised and sometimes condemned? Readers will see that what qualifies as deviance varies from place to place, time to time, and situation to situation. The book explores some of the most frequent contexts for deviant behavior in ways that challenge definitive or objective judgments. The Fifth Edition has been updated to include the most current developments in American society, including deviance at the highest levels of national politics and corporate life, sex abuse scandals, the opioid crisis, and the growing decriminalization of marijuana.

Taking Sides: Clashing Views in Social Psychology
An exhaustive, well-organized bibliography on all aspects of comic art, animation, caricature, and cartooning from Canada and the United States. Its more than 11,000 entries make it and the other ten volumes in the series the definitive references on comic art.

Defense and the Environment: Effective Scientific Communication
Taking Sides volumes present current controversial issues in a debate-style format designed to stimulate student interest and develop critical thinking skills. Each issue is thoughtfully framed with Learning
Outcomes, an Issue Summary, an Introduction, and an Exploring the Issue section featuring Critical Thinking and Reflection, Is There Common Ground?, and Additional Resources. Taking Sides readers also offer a Topic Guide and an annotated listing of Internet References for further consideration of the issues. An online Instructor’s Resource Guide with testing material is available for each volume. Using Taking Sides in the Classroom is also an excellent instructor resource. Visit www.mhhe.com/takingsides for more details.

Environmentalism for a New Millennium This book breaks new ground in that its purpose is to "mainstream" teaching about the environment in higher education. Despite the holistic nature of the content, the book is structured-with two exceptions-around disciplinary chapters. The opening chapter, "Reinventing Higher Education," and the final chapter, "Reinventing the Classroom: Connected Teaching," provide an interdisciplinary frame for the book. Disciplinary chapters include anthropology, biology, economics, geography, history, literature, media and journalism, philosophy, political science, and religion. Each chapter begins with an introduction that asks, "What can the content and methodology of this discipline bring to the study of the environment?" and conversely, "What challenges and opportunities does this material create for teaching basic concepts in this discipline?" Sample plans are presented next, either for course units or for full courses. Material for introductory or lower division courses generally precedes that for advanced or upper division courses. The chapters each conclude with a resources section that includes teaching materials, print and nonprint, and background material for the instructor. (JRH)

Dying Most people are afraid of death. But if you understand the process of dying, you will be more comfortable at life’s end. Autumn of life: A Guide to Aging and Dying was written by a hospice professional to open minds and hearts to a new way of understanding the process that we will all go through. The book answers some of the most basic questions, and it can serve as a resource for doctors, nurses, clergy, social workers, caregivers, and anyone who deals with hospice care or the death of a loved one. If you’ve ever been around someone who is dying, their fears and worries can be very scary. If their questions aren’t answered, their fear can become panic. Says the author, “I’ve worked in hospice for over 13 years and there is a lot of information in the book that is from my own experience.”

Hierarchy amidst Anarchy This exciting new volume demonstrates how environmental rhetoric and technical communication go hand and hand.

Issues in Bioethics and the Concept of Scale

Child Development This book is thoroughly original work on the meaning of teaching by one who has been widely credited with reshaping the field of religious education in the United States, and to have had a significant effect also in many other countries. Despite a steady flow of books that have "teaching" in the title, nearly all of them leave out most of the story. In Showing How, Gabriel Moran presents the full story of the act of teaching. Part 1 establishes a fundamental meaning for "to teach," examining why there exists a deep-seated fear that teaching is an immoral act. Professor Moran then grounds the meaning of "to teach in its most basic forms, moving from examples in the nonhuman world (what the mountain teaches the mountain climber) to communal and nonverbal forms of teaching among humans. Part 2 explores the languages of teaching and the diverse forms of speech appropriate to teaching; rhetorical forms, including storytelling and preaching; therapeutic languages; and religion" preservation of these languages in ritualized settings, including confessing and mourning. Part 3 draws out the implications for education, the school, and the teaching of morality. Showing How addresses not only schoolteachers but parents,
counselors, ministers, administrators, and everyone who can recognize teaching as a fundamental human act. By exposing the root meaning of teaching, the book represents a challenge to any proposals for educational reform. Gabriel Moran is Professor and Director of Religious Education in the Department of Culture and Communication, New York University. He is the author of sixteen books, including Uniqueness: Problem or Paradox in Jewish and Christian Traditions and A Grammar of Responsibility.

Monitoring Detention, Custody, Torture and Ill-treatment Issues in Bioethics and the Concept of Scale arose from the author's deep and committed interest in ecology, moral philosophy, and medicine, and how they are interrelated. William A. Cook expands on the recognition that spatial and temporal scale characteristics are factors in the understanding and modeling of ecological systems and in decision-making around ecological and environmental issues, and introduces this dynamic to the field of bioethics. The concept of scale, from hierarchy theory as it is used in ecology to deal with the complexity and interrelationships of systems, is explored and identified as a factor and potential source of conflict in the field of bioethics. This notion of scale is conceptually useful for considering the complexity of some bioethical issues.

Taking Sides

Taking Sides: Clashing Views in Lifespan Development With its hallmark active learning approach, the second edition of this topically-organized text is the most interactive introduction to child development today. Dynamic learning activities in each chapter invite students to forge a personal connection to the latest topics shaping the field, including neuroscience, diversity, culture, play, and media. Using innovative pedagogy, Child Development: An Active Learning Approach reveals a wide-range of real-world applications for research and theory, creating an engaging learning experience that equips students with tools they can use long after the class ends.

Environmental Health Curricula at Schools of Public Health These are exciting times in theological education as old models are being reassessed and teachers and schools are looking for guidance on how best to do the job and how to profitably relate to students in the ministry of teaching. Increasingly, the motif of hospitality is being used to guide our thinking and practice, but it needs a careful assessment if it is to be of maximum use to theological education today. This book provides an integrated biblical, theological, and educational rationale to inform theological educators of the place of hospitality in enhancing their quest to create more effective learning environments for the holistic formation of students. Dr Davina Soh explores key elements of hospitality such as inclusion, presence, care, and reciprocity, which when combined, can deliver the best possible educational experience for theological students and transform an entire institution.

Taking Sides The focus of this book extends the discourse on student engagement beyond prescriptive definitions and includes substantive ethical and political issues relating to this concept. As such, this collection includes voices of educational theorists, practitioners, and students. It provides a counter discourse to the current dialogue on student engagement in educational theory and practice which equate it primarily with behavioral and attitudinal characteristics including student compliance and qualities of teaching or teachers. In this collection, engagement is not viewed simply as a matter of techniques, strategies or behaviours. Rather, the understandings of student engagement presented, while distinct from each other, are imbued with a common vision of education for democratic transformation or reconstruction as operational for and in democratic communities.
Contributors to this volume examine issues of the purpose of student engagement, and the question of the criteria, standards, and norms which are used to determine the quality and degree of engagement, and ultimately whether or not all forms of student engagement are equally worthwhile. This collection is intended for use in teacher and administrator preparation programs as well as school and district professional development initiatives.

Student Engagement in Urban Schools

Comic Art of the United States Through 2000, Animation and Cartoons This book uses controversies as a gateway through which to explore the origins, ethics, key moments, and people in the history of anthropology. It draws on a variety of cases including complicity in "human zoos", Malinowski’s diaries, and the Human Terrain System to explore how anthropological controversies act as a driving force for change, how they offer a window into the history of and research practice in the discipline, and how they might frame wider debates such as those around reflexivity, cultural relativism, and the politics of representation. The volume provokes discussion about research ethics and practice with tangible examples where gray areas are brought into sharp relief. The controversies examined in the book all involve moral or practical ambiguities that offer an opportunity for students to engage with the debate and the dilemmas faced by anthropologists, both in relation to the specific incidents covered and to the problems posed more generally due to the intimate and political implications of ethnographic research.

Anthropological Controversies Anyone interested the future of environmentalism will find this book an invaluable guide.

Taking Sides: Clashing Views in World History, Volume 1: The Ancient World to the Pre-Modern Era, Expanded Presents a collection of essays that debate issues associated to world history including male dominated societies in the ancient world, the Crusades, and Africa’s role in human history.

Taking Sides

Child Development: An Active Learning Approach Exploring the Dimensions of Human Sexuality, Fourth Edition addresses all aspects of sexuality— biological, spiritual, psychological, and sociocultural— and presents the information both factually and impartially. Throughout the text, students will find an emphasis on health and well-being based on the assumption that we are all sexual beings and that sexuality should be viewed in its totality. Students are encouraged to explore the varied dimensions of human sexuality and see how each affects their own personal sexuality, sexual health, and sexual responsibility.

In Pursuit of Privacy This landmark practical guide assists all those involved in monitoring detention conditions and investigating and preventing torture. The prestigious global author team identify the medical, legal and professional frameworks and international instruments applicable to those detained, and highlight how torture or other cruel and inhuman degrading treatments or punishments are identified, investigated and should be prevented. A comprehensive and wide range of detention settings and circumstances are covered including police stations, prisons, mental health, and social care civil conditions to prisoner of war, detention camps, military, and armed conflict. Advice, monitoring, and assessment is given for special groups, including the custody of women, children, vulnerable adults, and individuals on hunger strike. Practical guidelines are given for the assessment of ill-
treatment of individuals in custody including sexual abuse. Online links to the latest legal, ethical, and medical guidelines for key countries help to make this book appropriate for all. Challenging, thought-provoking yet thoroughly practical, this book is essential reading for anyone involved in the monitoring of detention conditions and the treatment and investigation of individuals in any form of custody. The content is aimed primarily at healthcare professionals but it also highly relevant for anyone who may form part of a visiting team, including lay individuals, lawyers and law enforcement professionals, as well as for academics.

Showing How Power, Politics & Society: An Introduction to Political Sociology discusses how sociologists have organized the study of politics into conceptual frameworks, and how each of these frameworks foster a sociological perspective on power and politics in society. This includes discussing how these frameworks can be applied to understanding current issues and other "real life" aspects of politics. The authors connect with students by engaging them in activities where they complete their own applications of theory, hypothesis testing, and forms of inquiry.

The Relativity of Deviance This work provides an up-to-date examination of the ways people face dying and bereavement. In this third edition previous chapters are thoroughly revised, and new contributors expand areas that have changed significantly. Reflecting the field's complex interdisciplinary character, the chapters cover such diverse areas as psychology, nursing, medicine, AIDS, family studies, sociology, education, philosophy, law, religion, the humanities and political science, whilst highlighting thanatology's core psychological and therapeutic caregiving dimensions. First, the text offers broad examinations of death systems from the vantage points of various cultural, historical and disciplinary perspectives. The second section represents the core of the book, offering detailed surveys of the "data" of death, dying and bereavement as they relate to different phases of our encounter with death as an abstract possibility and concrete reality. Next are chapters addressing a cluster of death-related issues and challenges that confront us at both a societal and individual level - such as AIDS - and finally the volume closes with a few reflections on the complexity of contemporary thanatology, framing some issues and recommendations that deserve greater attention by scholars, researchers, policy makers and practitioners. Also included is a comprehensive resource bibliography on the topic. This text is intended to be of use as a resource for all those interested in reading about death studies, both professionals and students alike.

Understanding the Social and Emotional Lives of Gifted Students The success of Environmental Management Systems (EMS) at military facilities requires support and leadership from the highest levels of management, adequate resources for development and implementation, and an acknowledgement by the military commanders that EMS is an integral part of facilities and operations management. The theme of this book is the effective communication of environmental concerns in a changing military environment.

Teaching Critical Thinking in Psychology It is increasingly difficult for leaders to act in the short term in ways that will yield positive, long-term results. Instant information flows are bringing planning horizons closer and closer to the present; pressures from multiple stakeholders are eroding prospects for consensus. Are we preparing our students, the next generation of leaders, for this kind of flat world? In exploring the world of 2025, the Seven Revolutions project identified seven areas of change expected to be most "revolutionary": population resource management and environmental stewardship technological innovation and diffusion the development and dissemination of information and knowledge economic
integration the nature and mode of conflict the challenge of governance Each of these seven forces embodies both opportunity and risk in the years ahead. Together, they will transform the way we live and interact with one another. That is why we call them the “Seven Revolutions.” This Tool Kit, a part of the Seven Revolutions (7 Revs) initiative to educate globally competent citizens, is the product of a collaboration among the American Association of State Colleges and Universities (AASCU), the Center for Strategic and International Studies (CSIS), and the New York Times. The Tool Kit provides background and content on the 7 Revs from CSIS, case studies on how seven AASCU campuses have used 7 Revs in their curricula, and teaching materials and resources that can be used to educate globally competent citizens using the 7 Revs framework.

A utumn of Life Although the field of child and adolescent development seems to be an easy one in which to provide active learning opportunities to students, few textbooks currently exist that actually do this. Child Development: An Active Learning Approach includes the following key features: - Challenging Misconceptions: true/false or multiple choice tests are incorporated at the beginning of each chapter to specifically address topics that are sources of misunderstanding amongst students. - Activities with children and adolescents: 'hands-on' activities that complement the ideas of the text, as an integral part of the text, rather than as "add-ons" at the end of each chapter. - 'The journey of research' will introduce students to the process of research that leads from early findings to more refined outcomes through real-life examples - 'Test Yourself' sections include activities that cause students to reflect on an issue through their own experiences to bring about increased motivation and understanding of a specific topic. - The Instructor's Resource CD-ROM includes a computerized test bank, PowerPoint Slides, sample syllabi, suggested in-class learning activities, and homework assignments. - The Student Study Site includes interactive videos, self-quizzes, key term flashcards, SAGE journal articles with accompanying exercises, and web links with accompanying exercises.

Power, Politics, and Society First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

The Environment Dictionary A History of Psychology: The Emergence of Science and Applications, Sixth Edition, traces the history of psychology from antiquity through the early 21st century, giving students a thorough look into psychology's origins and key developments in basic and applied psychology. This new edition includes extensive coverage of the proliferation of applied fields since the mid-twentieth century and stronger emphases on the biological basis of psychology, new statistical techniques and qualitative methodologies, and emerging therapies. Other areas of emphasis include the globalization of psychology, the growth of interest in health psychology, the resurgence of interest in motivation, and the importance of ecopsychology and environmental psychology. Substantially revised and updated throughout, this book retains and improves its strengths from prior editions, including its strong scholarly foundation and scholarship from groups too often omitted from psychological history, including women, people of color, and scholars from outside the United States. This book also aims to engage and inspire students to recognize the power of history in their own lives and studies, to connect history to the present and the future, and to think critically and historically. For additional resources, consult the Companion Website at www.routledge.com/cw/woody where instructors will find lecture slides and outlines; testbanks; and how-to sources for teaching History and Systems of Psychology courses; and students will find review a timeline; review questions; complete glossary; and annotated links to relevant resources.
Taking Sides: Clashing Views in Anthropology analyzes the underlying basis for state participation in cooperative international structures.

The Communitarian Organization The Environment Dictionary provides an essential source of information on all aspects of the environment. It includes all the basic scientific terms and concepts along with socio-economic, cultural, historical and political elements which impact on the environment. This dictionary provides the interdisciplinary approach required to understand environmental issues worldwide. Designed for a wide range of readers, the dictionary is up-to-date, easy to read and to reference and clearly and attractively presented. Selected environmental issues which have particular importance are treated in greater depth through a series of boxed case studies. A wide range of maps, diagrams, figures and photos illustrate the texts and extensive cross-referencing between entries ensures readers can build on their knowledge. References and further reading sections are drawn from a wide range of accessible sources - from newspaper articles and popular magazines to academic texts and journals and provide easy access to further study and development of readers' specific interests.

Taking Sides: Clashing Views in American Foreign Policy

Educating Globally Competent Citizens Judith Wagner DeCew provides a solid philosophical foundation for legal discussions of privacy by articulating and unifying diverse arguments on the right to privacy and on how it should be guaranteed in various contemporary contexts. Philosophers and legal theorists tend either to define privacy narrowly or to abandon privacy.
as conceptually incoherent, she claims. In order to assess how far privacy should extend, and determine how the wide range of specific cases can be reconciled, DeCew surveys the history of the notion of privacy as it first evolved in American tort law and constitutional law and then analyzes current characterizations. In different contexts, privacy has been defined on the basis of information, autonomy, property, and intimacy. DeCew’s broader claim is that privacy has fundamental value because it allows us to create ourselves as individuals, offering us freedom from judgment, scrutiny, and the pressure to conform. Feminist theorists often view privacy as a tool for shielding abuses. DeCew responds to this feminist critique of privacy, as well as addressing the issues of abortion and of gay and lesbian sexuality in the context of specific landmark legal cases. In discussions of Roe v. Wade, Bowers v. Hardwick, and the Hart/Devlin debates on decriminalization of homosexuality and prostitution, DeCew applies her broad theory to sexual and reproductive privacy, anti-sodomy laws, and the legislation and enforcement of morals. She finally discusses the intersection of privacy with public safety concerns, such as drug testing, and in light of new communication technologies, such as caller ID.
